

## **Skin Preparation Before Shunt Surgery** **with JOHNSON'S BABY PRODUCT**

### **Preparing the Skin Before Surgery**

Preparing or "prepping" skin before surgery can reduce the risk of infection at the surgical site. To make the process easier, this facility has chosen Johnson's Baby Product to wash the hair and skin. The steps below outline the prepping process and should be carefully followed.

**Prep only the circled area on the evening before surgery using the directions below. Please read all of the instructions before you begin.**

***\*Do not apply lotions or shave the skin prep area!***

### **Directions:**

- The night before surgery, your child should bathe or shower.
- Shampoo the hair and wash the body with Johnson's Baby Product or your home products.
- Dry with a clean towel and apply clean clothes.
- Do not apply any lotions, deodorants, powders or perfumes to the body areas.
